The Solemnity of the Epiphany of the Lord

Read

The Epiphany marks the arrival of visitors, identified in Scripture as the magi, to the place where Jesus was born. Although we know little about them, we do know they brought three gifts:

Gold — a symbol of wealth and power, identifies the recipient as a king.

Frankincense — the crystalized resinous sap of a tree used as incense and as an offering, is symbolic of prayer.

Myrrh — another resinous tree sap, was

used in healing liniments and as an embalming ointment. Myrrh is an odd gift for a child—so, even at the beginning of Jesus' life on earth, this gift foreshadows his death.

Reflect

For much of the secular world, the holiday season has died down. Reflect on the joys of the holiday season and what you have left to celebrate when the decorations are put away.

Pray

Say [this blessing](#) on your home on the Epiphany.

Act

Wish someone a Merry Christmas today! An easy way to evangelize is to wish someone a Merry Christmas during the Christmas season after December 25 and explain why. The liturgical season of Christmas begins with the vigil Masses on Christmas Eve and concludes on the Feast of the Baptism of the Lord.

STILL NO SYMPTOMS
Complete your 14-day quarantine starting from the day you were last exposed to COVID-19.

After your quarantine or isolation is over, you can resume normal activities. But don't forget to wear a mask!

*People are contagious two days before they start having symptoms and at least 10 days after the onset of their symptoms. People who have no symptoms are considered contagious starting from the day before they got tested, through at least 10 days.

**Symptoms may include fever or chills, cough, decreased olfactory or gustatory function, loss of taste or smell, sore throat, and other symptoms.

***A false negative test result is when the test result is negative when you actually are infected with COVID-19. This may happen when you test too soon after exposure and there is not enough virus in your system to be detected. A second potential false negative by retesting approximately 6-8 days from when you were first tested before you got tested.
