PROUDLY SERVING COFFEE WITH THE COUNSELOR

A Blend of Community & Conversation

Please Join us for Coffee with the Counselor!

January 29, 2021 at 12pm via
Microsoft Teams

(A link will be sent in advance.)

This first session will provide a time to meet with our new School Counselor, Rebekah Gilbert, and will include an introduction to therapeutic parenting with time for Q&A.

We will discuss different approaches across the ages for connecting emotionally with your child, tips for reflecting feeling, strategies for responding vs. reacting, and ways to offer guidance instead of advice.

Grab your favorite coffee or tea and we look forward to seeing you there!

CKS COVID-19 Response Updates

BEEN EXPOSED TO COVID-19?

Be Informed: Know Your Next Steps

Chart provided by the Texas Medical Association COVID-19 Task Force

If you have trouble breathing or other serious symptoms, consult your physician for specific medical advice. This chart is intended for the general public, not health care workers.

COVID-19
CORONAVIRUS DISEASE

YOU'VE BEEN EXPOSED TO COVID-19

This means you were **within 6 feet** of someone who tested positive (and was **contagious***) for **more than 15 minutes** while **not wearing a mask**.

YOU HAVE SYMPTOMS**

GET TESTED.
While waiting on your test results, be sure to stay home and away from others.

YOU DID NOT OR COULD NOT GET TESTED

ISOLATE and stay home until 10 days have passed since you first got symptoms, 24 hours have passed since you had a fever (without medication), and your symptoms have improved.

NOTE: Anyone who lives with you needs to quarantine for 14 days since their last contact with you.

YOU GOT TESTED

YOU TESTED POSITIVE

ISOLATE and stay home for 14 days since you were exposed to COVID-19. If you **MUST** go out, wear a mask and stay 6 feet away from anyone who doesn't live with you.

YOU TESTED NEGATIVE

QUARANTINE and stay home for 14 days since you were exposed to COVID-19. If you **MUST** go out, wear a mask and stay 6 feet away from anyone who doesn't live with you.

YOU HAVE NO SYMPTOMS

CONSIDER GETTING TESTED. Quarantine and wait at least 6 to 8 days before you test in order to avoid a possible false negative*** result. Keep in mind that when testing is in high demand, your results may be delayed by several days.

YOU DID NOT OR COULD NOT GET TESTED

QUARANTINE and stay home for 14 days since you were exposed to COVID-19. If you **MUST** go out, wear a mask and stay 6 feet away from anyone who doesn't live with you.

After your quarantine or isolation is over, you can resume normal activities. But don't forget to wear a mask!

*People are contagious two days before they start having symptoms and at least 10 days after they start having symptoms. People who have no symptoms are considered contagious during these two days before they get tested, though at least 5 days.

**Symptoms may include fever or chills, cough, shortness of breath or difficulty breathing, body aches, headache, sore throat, and loss of taste.

***A false negative test result is when the test result is negative when you actually are infected with COVID-19. This may happen when you test too soon after your exposure, and there is not enough virus in your system to be detected. Avoid a potential false negative by waiting approximately 6 days from when you were last exposed before you get tested.

This document provides general information related to responses to the COVID-19 disease. It is not medical advice and does not substitute for the advice of your physician or other health care professional. Consulting your personal physician is recommended when faced with health issues to obtain specific medical advice taking into consideration your medical condition.
