### **Message from the Clinic:**

Dear CKS Parents/Guardians,

If your child has any medication

(prescription and/or over the counter) in the clinic, please pick up the medication on/before the last day of school. Emergency medications (i.e. EpiPen, inhaler), will need to remain in the clinic until the last day the student is on campus. No medication will be stored during the summer months. Any medications remaining in the clinic after the last day of classes (06/8/2021) will be disposed of.

**Parents must be masked and will be permitted to go to the clinic to pick up medications.**

Thank you for your cooperation with this matter.

Thank you,

**YOU HAVE NO SYMPTOMS**  
CONSIDER GETTING TESTED. Quarantine and wait at least 6 to 8 days before you test in order to avoid a possible false negative\*\*\* result. Keep in mind that when testing is in high demand, your results may be delayed by several days.

After your quarantine or isolation is over, you can resume normal activities. But don't forget to wear a mask!

\*\*People are contagious two days before they start having symptoms and at least 5 days after the onset of their symptoms. People who have no symptoms are considered contagious starting from the time they are tested, through at least 10 days.

\*\*\*Symptoms may include fever or chills, cough, shortness of breath, difficulty breathing, loss of taste, headache, sore throat, and other COVID-19 signs.

\*\*\*\*A false negative test result is when the test result is negative when you actually are infected with COVID-19. This may happen when the test is done after your exposure is not enough time in your system to be detected. Avoid a potential false negative by making approximately 6-8 days from when you were first exposed before you get tested.

This document provides general information related to exposure to the COVID-19 virus. It is not medical advice and does not substitute for the advice of your physician or other health care professional. Consulting your personal physician is recommended when you have health issues to obtain specific medical advice relating to your individual situation.
