# Crusaders Care

CKS is excited to announce a partnership with  
**The Quispicanchi Project!**

“We are thrilled to have the opportunity to support the project’s mission in *supporting and empowering families and organizations of indigenous and rural communities through the cultivation of culturally responsible sustainable solutions in the Quispicanchi Province of southern Peru.*”

100% of The Quispicanchi Project’s efforts benefit Catholic ministries and missions in the region directed by the Jesuits of Peru.

We were thrilled to have a member from the Quispicanchi Project Executive Committee, Paul Gramling, come present about their mission and work in Peru. The 5th and 6th grades made hygiene and education kits to be delivered to three regional parishes this summer.

After your quarantine or isolation is over, you can resume normal activities. But don't forget to wear a mask!

\*People are contagious two days before they started having symptoms and at least 10 days after they stopped having symptoms. People who have no symptoms are considered contagious starting from the day before they got tested, through their test 14 days.  
\*\*Symptoms may include fever or chills, cough, shortness of breath or difficulty breathing, body aches, headache, sore throat, and loss of taste.  
\*\*\*A false negative test result is when the test result is negative when you actually are infected with COVID-19. This may happen when you test too soon after your exposure, and there is not enough virus in your system to be detected. Avoid potential false negatives by waiting approximately 48 hours from when you were first exposed before you get tested.  
This document provides general information related to COVID-19. It is not medical advice and does not substitute for the advice of your physician or other health care professional. Consulting your personal physician is recommended when faced with health issues to obtain specific medical advice taking into consideration your medical condition.
