## BEEN EXPOSED TO COVID-19?

Be Informed: Know Your Next Steps

Chart provided by the Texas Medical  
Association COVID-19 Task Force

If you have double breathing or other serious symptoms,  
consult your physician for specific medical advice.  
This chart is intended for the general public,  
not health care workers.

COVID-19  
CORONAVIRUS DISEASE

**YOU'VE BEEN  
EXPOSED TO  
COVID-19**  
This means you were within 6 feet  
of someone who tested positive  
(and was contagious\*) for more  
than 15 minutes with or  
without wearing a mask

**YOU HAVE  
SYMPTOMS\*\***

**GET TESTED.**

While waiting on your test  
results, be sure to stay home and  
away from others.

**YOU DID NOT  
OR COULD NOT  
GET TESTED**

**Isolate** and stay home until 10 days have passed since you first got symptoms; 24 hours have passed since you had a fever (without medication), and your symptoms have improved.

**NOTE:** Anyone who lives with you needs to quarantine for 14 days since their last contact with you.

**YOU GOT TESTED**

**YOU TESTED  
POSITIVE**

**Quarantine** and stay home for 14 days since you were exposed to COVID-19. If you **MUST** go out, wear a mask and stay 6 feet away from anyone who doesn't live with you.

**YOU HAVE  
NO SYMPTOMS**

**CONSIDER  
GETTING TESTED.**

Quarantine and wait at least  
6 to 8 days before you test in  
order to avoid a possible  
false negative\*\*\* result.  
Keep in mind that when testing is  
in high demand, your results  
may be delayed by several days.

**YOU DID NOT  
OR COULD NOT  
GET TESTED**

Quarantine and stay home for 14 days  
since you were exposed to COVID-19.  
If you **MUST** go out, wear a mask and  
stay 6 feet away from anyone who  
doesn't live with you.

**YOU GET  
SYMPTOMS**

**GET TESTED.**

While waiting on  
your test results,  
be sure to stay  
home and away  
from others.

**STILL NO  
SYMPTOMS**

Complete your  
14-day quarantine  
starting from the  
day you were  
last exposed to  
COVID-19.

**YOU GOT TESTED**

**YOU TESTED  
NEGATIVE**

**Quarantine** and stay home for 14 days since you were exposed to COVID-19. If you **MUST** go out, wear a mask and stay 6 feet away from anyone who doesn't live with you.

**YOU TESTED  
POSITIVE**

**Isolate** and stay home until 10 days have passed since you first got symptoms; 24 hours have passed since you had a fever (without medication), and your symptoms have improved.

**NOTE:** Anyone who lives with you needs to quarantine for 14 days since their last contact with you.

After your quarantine or isolation is over, you can resume normal activities. **But don't forget to wear a mask!**

\*\*People are contagious two days before they started having symptoms and at least 10 days after they started having symptoms. People who have no symptoms are considered contagious starting from two days before they got tested, through at least 10 days.

\*\*Symptoms may include fever or chills, cough, shortness of breath or difficulty breathing, loss of voice, headache, sore throat, and other symptoms.

\*\*\*A false negative test result is when the test result is negative when you actually are infected with COVID-19. This may happen when you test too soon after your exposure, and there is not enough virus in your system to be detected. Avoid a potential false negative by waiting approximately 6-8 days from when you were first exposed before you get tested.
